ETH zürich

CAS ETH in Cloud and Mobile Computing (CAS CMC), Sept. – December 2026

General Information for MAS AID and CAS CMC Participants

Courses

Please remember to enrol in the Autumn semester and then register for the four CAS CMC courses (modules) in your myStudies account. Once registered, you will be able to access the Moodle page of each module, where the lecturers provide all the course materials and class communications.

All classes will be held at the ETH Zentrum campus. The schedule and location of classes is provided in the "CAS CMC Class Schedule" document and can also be found in the ETH course catalogue.

There will be a coffee break during the morning and afternoon sessions and a one-hour lunch break on Fridays, typically from 13:00 to 14:00. The coffee breaks and lunches are provided and will be at a close-by canteen or catered outside the classroom.

Course Materials

The primary location for all course materials such as lecture slides, homework assignments, etc. is on Moodle, which you can also access through your myStudies account. Please check the course Moodle page before each weekend of classes for additional information the lecturers might have posted regarding their courses.

Performance Assessments

Either a graded or ungraded performance assessment is planned for each course as indicated in the ETH course catalogue. In order to receive the ECTS for graded courses, you need a passing grade of at least 4. For ungraded (pass/fail) courses, you must pass the performance assessment to receive the ECTS credits. A performance assessment that is not completed on time (e.g. unapproved absence/no show) is considered a failure. Per regulation, you can repeat a failed performance assessment only once.

Please note that a **separate registration** is **not required** for the examinations in our programme since they are considered integrated performance assessments. You will receive email reminders to register for the exams, which are sent automatically to all ETH students, but these do not apply to our programme and can be ignored.

Absence Policy

Programme participants are expected to attend all meetings of all classes in which they are enrolled, including lectures, seminars, laboratories, etc. The specific attendance policy in each course is determined by the instructor of the course. Participants shall notify instructors as soon as possible in the event of an absence, e.g. in advance for planned absences and immediately after unforeseen emergencies. The participant is responsible for learning the material covered in class regardless of attendance. Depending on the specific circumstances related to the absence(s), participants may be required to perform additional work, required to repeat individual modules and/or entire CAS programmes, or may be expelled from the programme. Any mandatory work (as mentioned in the course catalogue) must be delivered, regardless of attendance; this may require the participant to reschedule work in agreement with the instructor.

Request of CAS CMC Diploma

The following **does not apply to MAS AID participants**, who do not receive CAS certificates, and, therefore, do not need to submit a request. The CAS CMC Certificate (or Diploma) is not automatically issued by ETH. Once you have successfully completed the CAS CMC programme, you must request the certificate through your myStudies account. The degree request can be submitted as soon as the required 12 ECTS have been obtained. Due to matriculation and ex-matriculation rules, ETH limits the time in which the request for the certificate will be accepted and not requesting the CAS certificate is recorded by ETH as non-completion of the programme. Therefore, please request your certificate promptly upon receipt of the necessary ECTS credits in order to successfully complete the programme.

Participant Profiles

To facilitate group work, social interactions and networking, a document with information about all MAS and CAS participants will be sent to your ETH email address at the beginning of the programme. Participant information will include your name, photo, ETH email address, title, company, and, if available, link to current LinkedIn profile. If you do not wish to be listed or wish certain information to be withheld, please let us know.

Parking at ETH Zentrum

Parking at ETH Zurich is subject to a charge and we cannot guarantee that parking spaces will be available at any given time. More information, including a map of the parking facilities at the Zentrum campus, is available on the ETH website.

Additional Information

Questions regarding the MAS or CAS programme should be addressed to the programme manager or the programme administrator.

Maria Rosaria Polito
Programme Manager
politom@inf.ethz.ch
+41 44 633 23 72

Jutta Uusitalo
Programme Administrator
